

Window Measurement Sheet

Please measure as accurately as possible. You may round up to the next quarter inch, but no more.

Be sure to measure each pane of glass individually without including any frames. Often windows next to or over one another that look the same size can be different widths and/or heights.

The **red arrows** show examples of **incorrect** width and height measurements.

The **green arrows** show examples of **correct** width and height measurements.

ROOM	WIDTH (Inches)	HEIGHT (inches)	NUMBER THIS SIZE
------	----------------	-----------------	------------------

When finished, email the dimensions to info@precisefilm.com with a short description of what you would like the film to do. We will get back to you with a proposal as soon as possible. That's it!
